Subject: Utility Patent Application No. 10/600701

EXPRESS MAIL NO.: ER 375169017 US

Dear Sir/Madam

Enclosed is my amended 21 page patent application and my check No. 437 for \$55.00 to pay for the extension of time as per your instructions both written and verbal. I have deleted the page with the symbolic representation of other wave and tide actuated pumps. This sheet was for informational purposes only to assist the patent examiner in determining the originality of my invention. I have rewritten my claims. All prior claims are void and replaced with this submission. There are a total of 21 claims only, 3 independent claims and 18 dependent claims.

This wave and tide actuated energy pump will provide 95% of the world's energy requirements once they are in operation. I am sure you have to buy gasoline and pay utility bills like anyone else. Once these pumps are in operation all energy costs will drop dramatically. I ask that this patent application be processed with all due speed and sent on to the patent examiner's office

If there are any more discrepancies to be dealt with I ask that you have a supervisor or some other referee contact me by phone so that we may get the matters expediently resolved and proceed to the examiner's office. I am pro-se, a small entity and at the filing of the 1<sup>st</sup> revision on September 12, 2003, I was "Legally Blind."
